

Rain Sensors Save you **MONEY**

How? There are 65 total average rainfall days in Council Bluffs from April - October.

If your rain sensor shut off your Irrigation System half the time during the watering season, your estimated savings are shown below.

5 Zone System Savings

$32 \text{ (days)} \times \$4.17 \text{ (water cost)} = \$133.44 \text{ Yearly Savings}$
5 year savings of \$667.20
49,152 Gallons per year
245,760 Gallons in 5 years

8 Zone System Savings

$32 \text{ (days)} \times \$7.98 \text{ (water cost)} = \$255.36 \text{ Yearly Savings}$
5 year savings of \$1276.80
78,643 Gallons per year
393,216 Gallons in 5 years

12 Zone System Savings

$32 \text{ (days)} \times \$15.09 \text{ (water cost)} = \$482.88 \text{ Yearly Savings}$
5 year savings of \$2414.00
166,112 Gallons per year
830,560 Gallons in 5 years
